## DESCRIPTIONS

### **FUNCTION** FatD

<code>DATASET(Types.DiscreteField)</code>	<b>FatD</b>
<code>(DATASET(Types.DiscreteField) d0, Types.t_Discrete v=0)</code>	

Will take a potentially sparse file d and fill in the missing with value v for Discrete Field datasets

**PARAMETER** d0 They myriad format Discrete Field dataset to be filled

**PARAMETER** v The value to assign missing records

**RETURN** A full Discrete Field dataset with every field populated
